LISIAN- THUS

重なり合う、永遠の愛。

These are annual herbaceous plants that grow to a height of 16 to 60 cm (6 to 24 inches). Their leaves are bluish-green and slightly succulent. They produce large, funnel-shaped flowers at the tips of long, upright stems, which may be single and straight or occasionally branched. The flowers can reach up to 60 millimeters (2 inches) in diameter and appear in a variety of colors, including pink, purple, white, and blue. Some are bi-colored, and yellow or carmine-red (deep red) flowers are also occasionally seen.

2026 New Varieties

“Colors That Touch Your Heart.”

Breeding, for us, is a commitment to enriching life through color. With advanced techniques and true horticultural passion, we develop varieties that offer beauty, reliability, and emotional resonance. We are proud to present these new possibilities.

Celeb 2 Silky Pink (F18-209)

A delicate, very pale pearl pink. Suitable for blooming from the cooler months of warm regions to early summer. The tree is vigorous and easy to grow tall. The color deepens in cooler temperatures.

Earliness	Flower Size	Plant Height	Rosetting
2	Mid-Large	Tall	Less sensitive

Prime 3 White ver.2 (F19-579)

It has good branching and produces voluminous cut flowers. Easy to grow and have a uniform height, inheriting the same characteristics as Prime 3 White.

Earliness	Flower Size	Plant Height	Rosetting
3	Medium	Tall	Sensitive

Celeb 3 Apricot (F18-948)

Large apricot-colored flower with subdued redness. Because the internodes tend to be long, it is recommended to cultivate it without letting it become too vigorous.

Earliness	Flower Size	Plant Height	Rosetting
3	Large	Tall	No data

Arosa 4 Violet (F18-874)

A very deep purple Arosa type variety. The flowers are slightly larger than Arosa 3 Violet, with improved rosetting tolerance.

Earliness	Flower Size	Plant Height	Rosetting
4	Small	Tall	Average

Macheriena Apricot (F20-201)

A deep apricot color variety with a unique sword-shaped petal. Some single petals are mixed in. In high temperatures, they become single petals.

Earliness	Flower Size	Plant Height	Rosetting
1	Small	Average	Less sensitive

Celeb 1 Crystal (F17-308)

Its early maturity allows it to bloom in winter in warm climates. Its flower shape resembles that of Celeb 2 Crystal. It turns slightly ivory in winter.

Earliness	Flower Size	Plant Height	Rosetting
1	Mid-Large	Slightly short	Less sensitive

Celeb 2 Crystal (F14-479)

Vigorous and easy to grow, with easy height control. It has large flowers with strong fringe. Because it is so vigorous, be careful of stem breakage during the growing period.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Tall	Less sensitive

Celeb 3 Crystal (F19-431)

Mid-late variety with sturdy stems. Good choice for those who have trouble with the soft stems of Celeb 2 White in warm season. Can be grown in relay with Celeb 2 Crystal.

Earliness	Flower Size	Plant Height	Rosetting
3	Large	Tall	Less sensitive

Celeb 1 Sakura Pink (F16-007)

An early maturity variety with a green core and a clean light pink petals. The color fades slightly in low light periods. The stems are sturdy.

Earliness	Flower Size	Plant Height	Rosetting
1	Mid-Large	Slightly short	Less sensitive

Celeb 2 Pink Mimi (F19-660)

The petals are densely packed and cup-shaped. The lower the temperature during flowering, the more petals there will be. This plant is relatively less vigorous, so be careful of chip burn.

Earliness	Flower Size	Plant Height	Rosetting
2	Medium	Moderately tall	Less sensitive

Celeb 2 Queen (F16-390)

Very large and gorgeous, light pink flower. The petals are quite strong despite the large size. It has strong vigor and tends to overgrow, so watering should be controlled well.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Tall	Less sensitive

Celeb 2 White (F09-104)

It is characterized by its pure white color and uniformity. Keeping it well-watered even after buds appear will increase the volume of the flowers.

Celeb 3 White (F19-444)

It has strong vigor and is easy to grow in terms of stem quality and height even in hot season. It has medium-sized flowers with dense petals.

Earliness	Flower Size	Plant Height	Rosetting
2	Medium	Average	Average

Celeb 2 Pink (F09-106)

A long-selling variety. This vibrant pink blooms beautifully and does not fade easily. The flowers open wide, creating a voluminous appearance.

Earliness	Flower Size	Plant Height	Rosetting
3	Mid-Large	Tall	Less sensitive

Celeb 2 Pink ver.2 (F19-664)

The flowers are deep pink and open wide. They are quite vigorous and nodes are long. Be careful not to let them stretch too much.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Slightly short	Average

Celeb 2 Garnet (F15-348)

The flowers have dense petals and a strongly fringed shape. The light pink color does not fade even in winter. Be careful of tip burn.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Less sensitive

Celeb 2 White (F14-942)

This variety has the best flower shape of the Celeb series. It is mid to mid-late maturing, but can be grown year-round, and one of the most popular variety distributed in Japan.

Earliness	Flower Size	Plant Height	Rosetting
2.5	Large	Average	Less sensitive

Celeb 2 Pretty (F16-349)

Light pink variety with medium flower size. It branches well even in cool temperatures and is easy to cultivate with little blasting. It has strong vigor, so be careful of overgrowing in winter.

Earliness	Flower Size	Plant Height	Rosetting
2	Medium	Moderately tall	Less sensitive

Celeb 2 Pearl Pink (F14-032)

The flowers are pale pink, with a darker color at the tips of the petals. Green center. When growing in winter, be careful as the color may become too pale if there is little sunlight.

Earliness	Flower Size	Plant Height	Rosetting
1	Large	Slightly short	Sensitive

Celeb 2 Extra Pink (F16-776)

A Celeb series variety with gorgeous flowers with strong fringe. The stems are slender and soft, so be careful to neck droop.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Sensitive

Celeb 2 Salmon Pink (F16-777)

Gorgeous flowers with wide petals and many layers. The color is classic salmon pink with a darker hue. The flowers are heavy, so make sure to keep the flower stems strong.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Less sensitive

Celeb 2 Madonna (F12-486)

A deep pink color. A Celeb-series variety that is relatively easy to cultivate. The color is darker at the petal edge and has a gradation.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Moderately tall	Less sensitive

Celeb 2 Pink Diamond (F12-832)

The green and pink colors create a classic atmosphere. The many overlapping petals of the flower resemble a rose when it is about to open.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Tall	Less sensitive

Celeb 2 Honey Pink (F11-139)

Pinkish apricot variety with relatively thick stem. The apricot color appears better in colder seasons. The plant is tall and easy to grow.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Tall	Less sensitive

Celeb 2 Misty Pink (F16-706)

A pale pink, large-flowered variety. The stems are hard, so it is suitable for early summer cultivation.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	No data

Celeb 3 Pink (F18-818)

Outstanding flower shape with its wide petals and loose fringe. A mid-late bloomer, one of the few in the Celeb Pink range.

Earliness	Flower Size	Plant Height	Rosetting
3	Large	Moderately tall	Sensitive

Celeb 2 Apricot (F17-716)

Clear apricot color. Large, overlapping flowers. The leaves are large, so be careful of tip burn. It is relatively sensitive to rosetting, so cooling during seedling stage is important.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Slightly short	Sensitive

Celeb 1 Rouge (F07-537)

Rose pink petals with strong fringes. Since it blooms early and has a short plant height, it is more suitable for winter production.

Earliness	Flower Size	Plant Height	Rosetting
1	Large	Slightly short	Sensitive

Celeb 1 Beige Neo (F10-514)

A medium-large flower with a green-pink color, early maturing but tall enough, a popular variety in North America.

Earliness	Flower Size	Plant Height	Rosetting
1.5	Medium	Slightly short	Less sensitive

Celeb 1 Lilac (F16-157)
A vibrant red wine colored Celeb variety. Excellent low temperature flowering, suitable for winter flowering in temperate region.

Earliness	Flower Size	Plant Height	Rosetting
1	Mid-Large	Average	Sensitive

Celeb 2 Grape (F12-036)
This reddish lavender variety has stronger petals than the other large-flowered lavender varieties. Stems are hard. Widely cultivated and proven variety.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Less sensitive

Celeb 2 Amethyst (F17-610)
Vibrant deep lavender color. The petals have fringes at the tips. The petals are sturdier than other light lavender varieties. Be careful of flower neck drooping.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Sensitive

Celeb 1 Blue (F05-049)
When grown in cooler temperatures, it has good uniformity, and has many branches, making it easy to bloom. Please note that in hotter temperatures, the color fades in a marbled pattern.

Earliness	Flower Size	Plant Height	Rosetting
1	Mid-Large	Slightly short	Less sensitive

Celeb 2 Night Blue (F16-325)
The flowers are large and crystal-shaped. They grow tall and well-balanced even in autumn and winter cultivation.

Earliness	Flower Size	Plant Height	Rosetting
1.5	Large	Moderately tall	Less sensitive

Celeb 2 Metallic Blue (F11-648)
A mysterious color that is a mixture of lavender and purple. A vigorous variety with large flower size. Be careful of sun burn.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Tall	Less sensitive

Celeb 2 Amethyst ver.2 (F17-609)
The hardness of the flower neck of Celeb 2 Amethyst has been improved. Other features are almost the same.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Sensitive

Celeb 2 Deep Lavender (F17-601)
A deep lavender variety with weak fringe but large flowers. The plant's appearance is similar to that of Blue Chateau.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	No data

Celeb 2 Mid Grape (F11-134)
Fringed reddish lavender color variety with firm flowers. It matures earlier than Celeb 2 Grape, has smaller flowers and more branches, and is better suited to growing in cooler seasons.

Earliness	Flower Size	Plant Height	Rosetting
1.5	Medium	Average	Less sensitive

Celeb 2 Navy (F14-769)
A blue variety from Celeb series. Although the fringes are not strong, the petals are layered and the plant branches even in autumn. It grows taller than other blue/violet varieties.

Earliness	Flower Size	Plant Height	Rosetting
3	Large	Tall	No data

Celeb 2 Turn Blue (F11-079)
This variety has a good balance of flower shape, plant height, branching, and plant form, making it easy to cultivate and suitable for cultivation in a wide range of seasons.

Earliness	Flower Size	Plant Height	Rosetting
1.5	Medium	Short	Less sensitive

Celeb 2 Turn Red (F16-301)
A medium-sized double flower with a reverse red picotee coloring. The white area becomes larger at high temperatures.

Earliness	Flower Size	Plant Height	Rosetting
1.5	Mid-Small	Short	Less sensitive

Celeb 2 Green (F07-064)

Yellowish lime green color. The petals are layered and suitable for blooming in hot weather. The green color gets strong in periods of strong daylight.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Tall	Less sensitive

Celeb 2 Mint Green (F10-521)

A refreshing green color with no yellowish tinge. The flower shape is similar to Celeb 2 Yellow, but the plant height is slightly lower.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Less sensitive

Celeb 3 Green (F14-375)

A refreshing green color with no yellowish tinge. The stems are stiff and suitable for over-summer cultivation. It has a lot of vigor and large leaves, so be careful of chip burn.

Earliness	Flower Size	Plant Height	Rosetting
3	Large	Tall	Average

Megalo 2 White (F07-943)

Pure white, medium-large double flowers. It has many nodes and is easy to grow tall, but be careful of stem breakage.

Earliness	Flower Size	Plant Height	Rosetting
2	Medium	Moderately tall	Average

Megalo 3 Mega White (F10-925)

Large, double-flowered, white, round-petaled variety with sturdy stems that allow them to grow tall even in hot weather.

Earliness	Flower Size	Plant Height	Rosetting
3	Large	Tall	Less sensitive

Elegance 3 Snow (F17-983)

A medium-large double flower with pure white color. Their maturity is same with Prime 3 White, with more fringes and volume to the sides.

Earliness	Flower Size	Plant Height	Rosetting
3	Medium	Tall	No data

Celeb 2 Yellow (F09-105)

This is an easy-to-grow variety with a well-balanced flower shape, plant height, branching, and plant form. It is suitable for a wide range of cultivation segments.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Average

Celeb 2 Gold (F11-609)

When they bloom in cooler temperatures, the gorgeous flowers have so many petals that the center is barely visible. The flowers become heavy, so trim the and make the flower stalk firmer.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Less sensitive

Celeb 3 Yellow (F17-315)

The internodes are shorter than those of Celeb 2 Yellow, and the stems are sturdy and grow slowly. Improved petal overlap and fringing when flowering in high temperatures.

Earliness	Flower Size	Plant Height	Rosetting
3	Large	Average	Less sensitive

Prime 3 White (F14-353)

This pure white variety has a well-formed flower shape. It produces many petals and maintains its height even in hot weather, making it ideal for highland summer cultivation.

Earliness	Flower Size	Plant Height	Rosetting
3	Medium	Tall	Sensitive

Wedding 2 Kiss (F16-343)

A small white flower that blooms mid-season to mid-late. If you reduce the amount of watering, the flowers will be small size.

Earliness	Flower Size	Plant Height	Rosetting
2.5	Mid-Small	Tall	Less sensitive

Wedding 2 Cake (F13-318)

A medium-sized, double-flowered variety with round petals. Good branching. Be careful of rosetting.

Earliness	Flower Size	Plant Height	Rosetting
2	Mid-Small	Slightly short	Sensitive

Arosa 2 Pure White (F19-422)
Pure white, round petal variety. Many layers, blooms at the top, and multi-branched. It grows compactly, but has many branches, so it can produce a voluminous cut flower.

Earliness	Flower Size	Plant Height	Rosetting
2.5	Mid-Small	Tall	Less sensitive

Arosa 3 Pure White (F10-923)
A strong-stemmed, rose-like shape, double-flowered variety with a pure white color.

Earliness	Flower Size	Plant Height	Rosetting
3	Mid-Small	Tall	Average

Arosa 4 Pure White (F13-460)
A white double-flowered variety that grows tall and voluminous. Suitable for summer cultivation in cool regions, it grows tall even without shade.

Earliness	Flower Size	Plant Height	Rosetting
4	Mid-Small	Tall	Sensitive

Megalo 2 Blue Picotee (F01-217)
Even after 20 years since its launch, it remains popular for its ease of cultivation and is a standard blue picotee variety. The blue border will become smaller in higher temperatures.

Earliness	Flower Size	Plant Height	Rosetting
2	Medium	Slightly short	Less sensitive

Megalo 2 Blue Picotee ver.2 (F16-302)
A blue picotee variety with a deep border color. Easy to grow tall. Suitable for high temperatures.

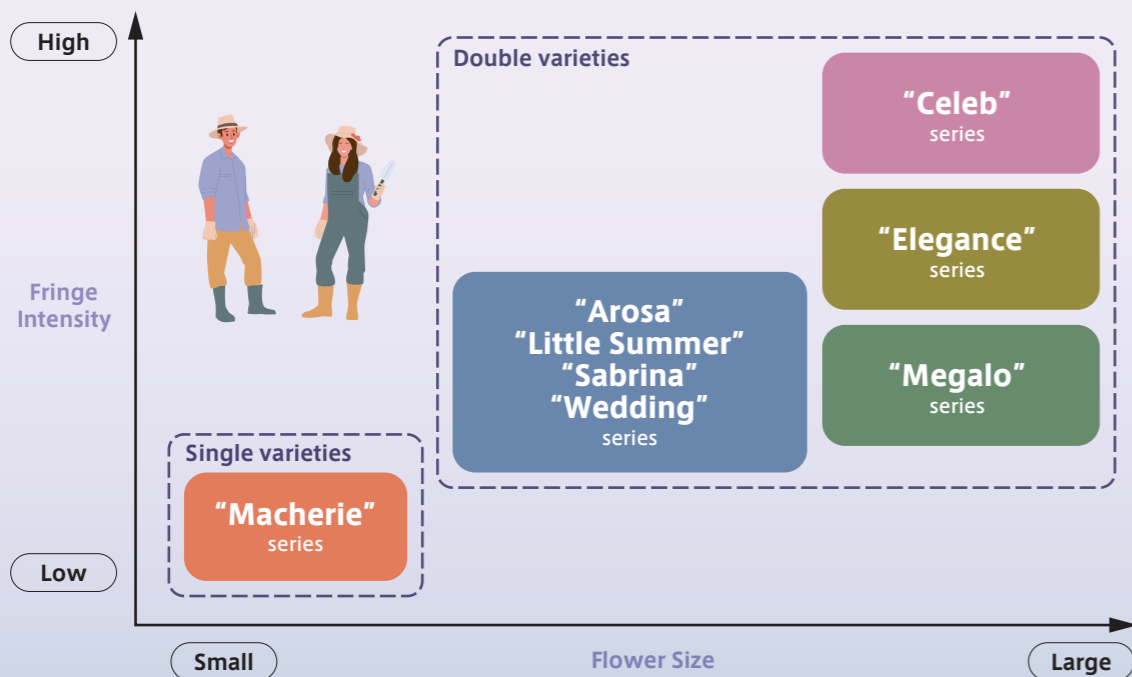

Earliness	Flower Size	Plant Height	Rosetting
2	Medium	Slightly short	Less sensitive

Megalo 3 Blue Picotee Imp. (F13-929)
Suitable for summer cultivation in cool regions. Reduced flower neck breakage. It maintains a clear, wide border even in summer. No short-day treatment (shading) is required.

Earliness	Flower Size	Plant Height	Rosetting
3	Medium	Tall	Average

Characteristics Chart of SUMIKA Lisianthus varieties

Megalo 3 Blue Picotee Max (F10-902)
A picotee variety with flower size comparable to the Celeb series. Easy to grow with few stem breakage.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Average

Arosa 3 Blue Picotee (F13-374)
The color of the border remains thick even during the summer. The number of petals is large and the border color is blue-purple. The plant height is easy to maintain.

Earliness	Flower Size	Plant Height	Rosetting
3	Medium	Tall	Sensitive

Arosa 4 Blue Picotee (F13-375)
The border color is a deep purple, creating a clear contrast. It is a late-maturing plant that grows tall even in hot weather, and does not require short-day treatment (shading).

Earliness	Flower Size	Plant Height	Rosetting
4	Mid-Small	Tall	Very sensitive

Megalo 2 Pink Picotee (F09-566)
A medium-early maturing, large-flowered pink picotee. It is not a very vigorous variety, so make sure to grow it strong as you would for over-wintering cultivation to ensure a good volume.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Less sensitive

Megalo 3 Wisteria (F11-634)
A large, voluminous lavender variety with relatively short internodes. Top flowering, and flowers bloom together.

Earliness	Flower Size	Plant Height	Rosetting
3	Large	Moderately tall	Average

Megalo 2 Light Wisteria (F15-863)
Pale lavender variety with round petals. The internodes are tight and the plant is relatively short. An elegant looking variety with round petals.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Moderately tall	Average

Arosa 3 Violet (F11-845)
Glossy deep purple, small cup-shaped double flowers. Be careful of tip burn and rosetting.

Earliness	Flower Size	Plant Height	Rosetting
3	Small	Average	Very sensitive

Arosa 1 Sky Blue (F14-037)
A refreshing light blue color with green center. The petals are stronger than those of lavender varieties. When it blooms in winter, it turns a bright blue-purple color.

Earliness	Flower Size	Plant Height	Rosetting
1	Small	Average	Average

Arosa 3 Blue (F11-854)
Blue, medium to small sized flowers. Even in autumn, the plant is tall and has many branches.

Earliness	Flower Size	Plant Height	Rosetting
3	Mid-Small	Average	Less sensitive

Megalo 2 Pink Picotee Imp. (F12-711)
The flower shape has been improved from Megalo 2 Pink Picotee, with the outer petals less open. Stiff stem, top flowering.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Less sensitive

Megalo 3 Lavender imp. (F11-424)
It has many branches and flowers, making it easy to cultivate, and is advantageous when grown in hot season.

Earliness	Flower Size	Plant Height	Rosetting
3	Medium	Average	Less sensitive

Blue Chateau (F14-744)
A large-flowered variety with a unique yellow and lavender color. The flower shape is similar to that of the Celeb series. The stem is relatively thin.

Earliness	Flower Size	Plant Height	Rosetting
1.5	Medium	Average	Average

Megalo 4 Blue Squash (F17-327)
This late-maturing blue flash variety which grows well and produces beautiful flowers even in hot season. The stems are thick and strong.

Earliness	Flower Size	Plant Height	Rosetting
4	Large	Average	Average

Elegance 3 Green (F16-397)
A standard green double flower with good plant height, many branches, and stiff stems. Suitable for winter production in warm regions and summer production in cool regions.

Earliness	Flower Size	Plant Height	Rosetting
3	Large	Tall	Less sensitive

Arosa 2 Green (F08-931)
Dark green, slightly soft stems, excellent flower quality and long shelf life.

Earliness	Flower Size	Plant Height	Rosetting
2	Small	Average	Less sensitive

Arosa 2 Yellow (F08-940)

Small, clear yellow flower with many petals. Tight, cup-shaped flower. Gives many branches.

Earliness	Flower Size	Plant Height	Rosetting
2	Small	Average	Less sensitive

Elegance 3 Champagne (F18-225)

A late-maturing variety that is easy to grow tall. Even in hot weather, it produces many petals and maintains a well-formed flower shape. The color is intense and uniform.

Earliness	Flower Size	Plant Height	Rosetting
3	Large	Tall	Less sensitive

Megalo 2 Deep Orange (F11-923)

This variety maintains a flash color even in low light conditions. It has a deeper orange color than Megalo 2 Champagne.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Moderately tall	Less sensitive

Arosa 3 Champagne (F15-324)

The plant grows tall but has strong stems. Ideal for autumn harvest.

Earliness	Flower Size	Plant Height	Rosetting
3	Mid-Small	Moderately tall	Less sensitive

Arosa 3 Pink ver.2 (F16-956)

Small, curled rose-like flowers, slightly dark pink, slightly heavy.

Earliness	Flower Size	Plant Height	Rosetting
3	Mid-Small	Average	Sensitive

Arosa 3 Red Flash (F16-945)

Small double cup-shaped flowers, vibrant red flash, be careful of tip burn.

Earliness	Flower Size	Plant Height	Rosetting
3	Small	Average	Average

Megalo 2 Yellow (F08-937)

The plant height and branching are well balanced, and the stems are strong. It produces many petals even in hot weather, and has a standard yellow double flower. Popular in Brazil.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Average	Average

Megalo 2 Champagne (F10-943)

A voluminous, large yellow-pink flash variety. The plant is tall and easy to cultivate.

Earliness	Flower Size	Plant Height	Rosetting
2	Large	Moderately tall	Average

Sabrina 1 Orange (F14-051)

This variety has hard petals and it is more vigorous than Little Summer series. The flower position is higher, making it easier to cultivate. The flowers are larger, with more fringes and petals.

Earliness	Flower Size	Plant Height	Rosetting
1.5	Mid-Small	Average	Less sensitive

Arosa 3 Champagne ver.2 (F18-202)

The flowers are more compact than Arosa 3 Champagne. Internode growth is also suppressed.

Earliness	Flower Size	Plant Height	Rosetting
3	Small	Average	Average

Arosa 3 Red (F11-851)

Deep red variety, the more sunlight there is, the darker it becomes. Be careful of tipburn and rosetting.

Earliness	Flower Size	Plant Height	Rosetting
3	Small	Average	Very sensitive

Arosa 3 Wine Flash (F14-904)

Small double cup-shaped flowers, impressive wine flash color. Be careful of tip burn and rosetting.

Earliness	Flower Size	Plant Height	Rosetting
3	Small	Average	Average

Little Summer 1 Orange (F02-015)

This variety is early-maturing and blooms low, so the cultivation period is limited, but the thickness of the petals is highly praised by growers. Be careful not to let the outer petals get sunburned.

Earliness	Flower Size	Plant Height	Rosetting
1	Small	Short	Less sensitive

Little Summer 1 Gold (F06-040)

Bright yellow variety with small, cup-shaped flowers. The flowers are compact and tight.

Earliness	Flower Size	Plant Height	Rosetting
1.5	Small	Average	Less sensitive

Macherie White (F06-079)

A sleek looking single variety with sword-shaped petal. Early maturing, easy to cultivate, and produces many flowers.

Earliness	Flower Size	Plant Height	Rosetting
1	Small	Average	Average

Macherie Squash (F07-949)

Pale blue flash color. In low sunlight, the color will not develop and will turn white.

Earliness	Flower Size	Plant Height	Rosetting
1	Small	Average	Average

Little Summer 1 Princess (F07-524)

It has beautiful colors and thick fringed petals. The plant vigor is weak, so it is difficult to get it to bloom in winter. However, once you master it, you will become addicted to this variety.

Earliness	Flower Size	Plant Height	Rosetting
1.5	Mid-Small	Short	Sensitive

Little Summer 2 Deep Pink (F01-155)

A special deep pink variety. The flowers are small and the petals are hard.

Earliness	Flower Size	Plant Height	Rosetting
2	Mid-Small	Short	Less sensitive

Little Summer 3 White (F10-547)

Rose-like shape flower with good fringes. Gives many flowers, top flowering.

Earliness	Flower Size	Plant Height	Rosetting
3	Small	Moderately tall	Less sensitive

Macherie Green (F07-948)

Pale green. A little slower than Macherie White.

Earliness	Flower Size	Plant Height	Rosetting
1	Small	Average	Average

Feminine (F06-060)

A single, small, pale pink flower.

Earliness	Flower Size	Plant Height	Rosetting
1	Small	Short	Less sensitive

Macheriena White (F07-291)

Small to medium-sized double variety with sword-shaped petals. The flower color is milky white.

Earliness	Flower Size	Plant Height	Rosetting
1.5	Mid-Small	Average	Average

AN070

The flowers are a deep, bright orange. The stems are sturdy and it's easy to grow tall from the first flower.

Earliness	Plant Height
2	90cm

AN119

A gentle apricot color. The flowers are large and double, creating a voluminous and gorgeous flower. Easy to grow.

Earliness	Plant Height
2	100cm

AN065

A very pale, soft pink. The flowers are large and fluffy. The flowers are well-packed and produce volume. Easy to grow.

Earliness	Plant Height
2	100cm

AN034

Bright yellow. Single variety, but becomes semi-double during cooler periods. Excellent balance of early maturity, stem quality, and flower density.

Earliness	Plant Height
1	85cm

AN031

Bright vermilion. Very early-maturing, but the slower spike is densely packed with many flowers.

Earliness	Plant Height
1	80cm

AN087

Wine color variety with blue stem. It grows rather slowly but has strong vigor and grows tall.

Earliness	Plant Height
2	90cm

AN066

The flower is pink all the way to the neck, and the petals are a translucent pink. Early-flowering.

Earliness	Plant Height
1-2	90cm

AN043

The petals are normal type without frills. The flowers are well packed and do not tend to be elongated. The stems are firm.

Earliness	Plant Height
2	85cm

AN046

Pale yellow. The flowers are densely packed and have well-defined fringes, giving them volume. Easy to grow tall.

Earliness	Plant Height
2	95cm

Let's try relay cultivation of lisianthus and snapdragons!

- * After harvesting lisianthus, simply plant snapdragons directly into the planting hole! It can be grown without tillage or soil disinfection!
- * It can be harvested earlier than growing secondary shoots of lisianthus.
- * Snapdragons are gaining attention as an energy-efficient crop that does not require electric lighting and can be grown with a heater set to 5°C in winter.
 - ※ If you are growing lisianthus after harvesting snapdragons, be sure to disinfect the soil.

Cultivation models in Japan
